

The Addict's Wake Pre-survey/Post-survey

1 Anyone can become addicted to drugs?

- a. No, not if you don't have a family history of drug use.
- b. No, not if you use drugs other than opiates.
- c. Possibly, but only if you want to.
- d. Yes.

2 People less than 25 years old are at a higher risk of developing a dependency on drugs than others. Why?

- a. They tend to be wilder when they use them.
- b. Their brains are developing, and this puts them at higher risk of using drugs as well as several complications.
- c. They don't listen when people tell them to stop using drugs because they think they know more than everyone else.
- d. Older people who use drugs don't listen when people tell them.

3 Stopping substance use that has progressed to a dependency is only a problem in people without strong enough willpower to stop using.

- a. True
- b. False

4 Cycle of addiction: (Circle the correct order of the cycle)

- a. Initial Use-Substance Abuse-Tolerance-Dependence-Addiction
- b. Initial Use-Substance Abuse-Dependence-Addiction-Tolerance
- c. Initial Use-Tolerance-Dependence-Substance Use-Addiction

5 Recovery is possible, and people can lead an amazing life after substance use disorder, although it takes lots of hard work.

- a. True
- b. False

6 Higher risk of initial use: (Circle all that apply)

- a. Family history of drug use
- b. Other mental health disorder
- c. Abuse or neglect
- d. Chaotic living environment
- e. Peer group or family that is permissive about drug use
- f. Depression, loneliness
- g. Social issues
- h. Poor grades
- i. Good grades
